

Ultimate **BUNRI** technology .

- High-performance filtrating ability (Suction filters are also superfluous)
- Frequency for tank cleaning is reduced, drastically
- Improvement for working environment
- You can extended the life of the coolant
- Drastic Power-saving (30~50% saving)
- Improvement for operation rate of the machining line
- Space-saving (20 - 30% reduction)

We are going forward company policy to make a contribution for prevention of global warming.

※ Filtration accuracy represents the internal experimental data. It is not meant as any warranty.
